VIVEK REDDY YASA

Tampa, FL | 813-732-0572 | yasavivekatwork@gmail.com | Open to Relocation

PROFESSIONAL SUMMARY

Data Intelligence graduate student (MS, USF, 4.0 GPA) with 1.5 years of enterprise experience at Diebold Nixdorf in Oracle Fusion Cloud Sales and Operations Planning, Demand Management, and Supply Planning. Gathered requirements from business users, created data models, worked on integration solutions and data validations, and deployed AI agents in Oracle planning modules used by 25+ planners. Skilled in Python and machine learning, with a strong interest in business analysis, technology delivery, and applied AI.

EDUCATION

University of South Florida, Tampa, FL **Expected Dec 2027**
Master of Science in Data Intelligence (Industrial and Management Systems Engineering) *GPA: 4.0 / 4.0*
Relevant Coursework: Statistical Foundations of Data Intelligence, Optimization, Deep Learning Analytics, Applied Data Intelligence

Woxsen University, Hyderabad, India **Aug 2021 - Apr 2025**
Bachelor of Technology in Computer Science and Engineering

TECHNICAL SKILLS

AI and Machine Learning: Machine Learning, Deep Learning, Generative AI, AI Agents (Oracle AI Agent Studio), Large Language Models (Llama, Cohere), Prompt Engineering, NLP (BERT), Computer Vision (CNNs), Predictive Modeling, Model Evaluation, TensorFlow, PyTorch Lightning, scikit-learn

Data and Programming: Python (pandas, NumPy), Data Analysis, Data Preprocessing, Data Modeling, Data Validation, Data Integration, Statistical Analysis, Data Visualization (Tableau), Flask, REST APIs, XML, Microsoft Excel

Enterprise Applications and Planning: Oracle Fusion Cloud SCM, ERP, Supply Chain Planning, Sales and Operations Planning (S&OP), Demand Management, Supply Planning, Oracle Integration Cloud (OIC), FBDI

Business Analysis: Requirements Gathering, Business Process Analysis, Functional Specifications, Solution Design, Integration Testing, Root Cause Analysis, Technical Documentation

PROFESSIONAL EXPERIENCE

Associate Enterprise Applications Analyst (Promoted from Intern) **Jul 2024 - Dec 2025**
Diebold Nixdorf, Hyderabad, India

- Gathered requirements from business users across demand, supply, and S&OP planning teams and translated them into functional specifications, process documentation, and solution designs for Oracle Fusion Cloud Supply Chain Planning
- Created data models within Oracle planning modules (Sales and Operations Planning, Demand Management, Supply Planning) to structure planning data and support supply decisions and management reporting
- Configured and deployed AI agents in Oracle Fusion Cloud planning modules using Oracle AI Agent Studio, engineering prompts, starter questions, and role-based security to give planners secure, conversational access to planning information
- Built agent knowledge sources and evaluated LLM options (Llama, Cohere) for response accuracy and quality, enabling 25+ planners to self-serve answers instead of raising support requests
- Improved demand forecast accuracy by 8% by analyzing results and tuning machine learning model parameters across multiple forecasting models in Oracle Demand Management Cloud
- Owned the functional side of Oracle Integration Cloud (OIC) integrations connecting four source systems (SAP, Oracle EBS R12, TOTVS, NASH) to Oracle Fusion, defining data mappings, validation criteria, and test scenarios
- Diagnosed FBDI import and data transfer failures through root cause analysis, coordinating fixes with cross-functional teams to reduce recurring data load errors and improve planning data quality
- Supported 25+ business users through issue resolution and user documentation; tested new Oracle Redwood features ahead of rollout and reported defects to Oracle

Data Science Intern **Mar 2024 - Jul 2024**
The Alpha AI, Hyderabad, India

- Built a Python preprocessing pipeline (pandas, scikit-learn) and fine-tuned BERT-based models with PyTorch Lightning for expert-to-project matching, reaching 92.7% test accuracy and cutting manual review time by 20%
- Owned the end-to-end workflow, delivered a working model within one month, and presented findings to the Vice President

OPS Student Assistant (Grader, EGN 4450 Introduction to Linear Systems) **Aug 2026 - Present**
University of South Florida, Department of Industrial and Management Systems Engineering

- Evaluate homework and exams for an undergraduate engineering course using consistent rubrics, giving clear written feedback and coordinating with the instructor and teaching team via Canvas and Microsoft Teams

PROJECTS

Liver Fibrosis Classification Using CNNs

- Preprocessed and augmented medical image data, trained and evaluated a CNN classifier, and reached 91.4% accuracy and 94.6% F1-score, outperforming a ResNet benchmark

Hybrid Tomato Quality Assessment Pipeline

- Combined Xception deep features with an SVM and Random Forest ensemble, improving accuracy by 6% over published benchmarks, and deployed the model as a Flask web application
